

# SPANISH DICTIONARY

GARCÍA ALBERTO

## INTRODUCTION

[www.wordmeaning.org](http://www.wordmeaning.org) is an open and collaborative dictionary project that, apart from being able to consult meanings of words, also offers its users the possibility of including new words or nuancing the meaning of existing words in it. As is understandable, this project would be impossible to carry out without the esteemed collaboration of the people who follow us around the world. This e-Book, therefore, was born with the intention of paying a small tribute to all our collaborators.

GARCÍA ALBERTO has contributed to the dictionary with 14462 meanings that we have approved and collected in this small book. We hope that the reader is very valuable and if you find it useful or want to be part of the project, do not hesitate to visit our website, we will be delighted to receive you.

ayoteras are varieties or species of lacalabaza or gourd, in Mexico and Central America.

## **ayotes**

ayoteras are varieties or species of lacalabaza or gourd, in Mexico and Central America.

## **ayuínes**

belonging to a variety or species rioplatense, stinking Laurel to human excrement, to break the crust-

## **ayustar**

Fasting-it is about joining ends by knots or seams. the word "help" used within the study of Seamanship and Nautical.

## **ayuste**

a two-ply by their whips, in marineria-o also, a wooden parts at their ends.

## **azalea-**

Azalea- is an asteroid discovered by astronomer K. W . Reinmuth on January 31, 1924-

## **azales**

. belonging to a variety or species deuva-

## **azamboas**

belonging to a variety or species bitter denaranjo-

**azamboero**

name given to a variety or species (-) very wrinkled cidra

**azarero**

name given to a variety or species (-) cherry originating in Portugal -

**azariel**

God of lasaguas - of fishermen.

**azaúchos**

belonging to a variety or species wild dehiguera-

**aznacho**

aznacho-refers to a type of pine, the rodено pine, with rough red-brown bark, is usually flat-shaped, with long, thick dark green leaves and very resinous wood-

**aznachos**

belonging to a variety or species usually stunted rodено depino-

**aznallos**

belonging to a variety or species usually stunted rodено depino-

**azoa**

whip-soak with nitrogen a particular compound-

**azoaba**

whipped-soaked with nitrogen a particular compound-

**azoabais**

azoabais-empapabaiscon nitrogen a certain compound-

**azoaban**

whipped-soaked with nitrogen a particular compound-

**azoabas**

scouring-soaking with nitrogen a certain compound-

**azoamos**

we whipped-soaked with nitrogen a certain compound-

**azoan**

azoan-soak with nitrogen a particular compound-

**azoar**

azoarempapar with nitrogen or whip a certain compound-the vocabloazoars used within the study of Chemistry-

**azoará**

will whip-soak with nitrogen a particular compound-

**azoarán**

they will whip-soak with nitrogen a certain compound-

**azoarás**

you will whip-soak with nitrogen a certain compound-

**azoaremos**

we will whip-pack with nitrogen a certain compound-

**azoaré**

I will whip-soak with nitrogen a certain compound-

**azoaréis**

you will whip-soak with nitrogen a certain compound-

**azoaría**

whipping-soaking with nitrogen a particular compound-

**azoaríaís**

azoaríaís-empaparíaíscon nitrogen a certain compound-

**azoaríamos**

we would whip-soak with nitrogen a certain compound-

**azoarías**

lashing-soaking with nitrogen a particular compound-

**azoaron**

whipped-soaked with nitrogen a particular compound-

**azoas**

whipping-soaking with nitrogen a certain compound-

**azoaste**

whipping-soaking with nitrogen a certain compound-

**azoasteis**

azoasteis-empapasteiscon nitrogen a certain compound-

**azoábamos**

we whipped-soaked with nitrogen a certain compound-

**azoáis**

whip-soak with nitrogen a certain compound-

**azoe**

azoe-soak with nitrogen a particular compound-

**azoemos**

whip-soak with nitrogen a particular compound-

**azoes**

whipping-soaking with nitrogen a particular compound-

**azoé**

whip-soak with nitrogen a particular compound-

**azoéis**

whip-soak with nitrogen a certain compound-

**azolve-**

azolve-it is the material that is dragged by the waves or by the currents and that is deposited in the port areas or waterways.

**azoo**

whip-soak with nitrogen a particular compound-

**azoó**

azooempopaó with nitrogen a particular compound

**azucareros**

relating or pertaining alazucar

**azucenas**

belonging to a variety or species white delirium-

**azufaifas**

. belonging to the name of the jujube frutodel-

## **azuleños**

It is said, in Republic argentina-prov. Bs.Aires, for children born in town of: Blue

## **azuqueros**

relating or pertaining alazucar

## **azurquer**

It is a guardian angel of fire.

## **ábaco chino**

Chinese abacus- refers to the type of abacus divided into two parts, one upper, with two beads worth five points and one lower, with five beads worth one point each.

## **ábaco chino o suanpan**

Chinese abacus or suanpan- refers to the type of abacus divided into two parts, one upper, with two beads worth five points and one lower, with five beads worth one point each.

## **ábaco chino suanpán**

Chinese abacus suanpan-refers to the type of abacus divided into two parts, one upper, with two beads worth five points and one lower, with five beads worth one point each.

## **ábaco chino-suanpán**

Chinese abacus - suanpan - refers to the type of abacus divided into two parts, one upper, with two beads worth five points and one lower, with five beads worth one point each.

## **ábaco japonés o sorobán**

Japanese abacus or soroban-abacus that is used vertically and observing it that way, at the top has a row with only one count per column, which is worth five points- At the bottom, the columns with four beads each appear. In this way and according to its position, down or up, joining the accounts of the same column, you can add in total, nine units per column-

## **ábaco japonés o sorobán-**

Japanese abacus or soroban-it is an abacus that is used vertically and observing it that way, at the top it has a row with a single count per column, which is worth five points- At the bottom, the columns with four beads each appear. In this way and according to its position, down or up, joining the accounts of the same column, you can add in total, nine units per column-

## **ábaco japonés, sorobán**

Japanese abacus, soroban-it is an abacus that is used vertically and observing it that way, at the top it has a row with a single count per column, which is worth five points- At the bottom, the columns with four beads each appear. In this way and according to its position, down or up, joining the accounts of the same column, you can add in total, nine units per column-

## **ábaco japonés-sorobán**

Japanese abacus - soroban - it is an abacus that is used vertically and observing it that way, at the top it has a row with

only one count per column, which is worth five points- At the bottom, the columns with four beads each appear. In this way and according to its position, down or up, joining the accounts of the same column, you can add in total, nine units per column-

### **ábaco logístico**

logistical abac- it is an ancient element, modification of the pythagone table, wood, of simile format to a right triangle, on whose sides the numbers are contained from 1 to 60, and on the rest of its surface, the products of these numbers, placed between perpendicular lines, avoiding their repetition-

arched-belonging to untipo from American tree of very hard wood used in construction-

## **ácaros**

MITE = are thus called to small Arachnids belonging to the order of the arthropods, which include ticks and mange agents.

## **ácaros**

Acarosse is of a // unaORDEN of small-sized Arachnids that can transmit the germ of diseases - some are parasites.

## **ácere**

ácere - refers to the expression: used in the past, now disused, designating the Maple, aceraceo wooden tree very hard, dotted with spots by way of eye -

## **ácero**

refers to the expression : no antennas or no horns-

## **ácidamente**

Acid-refers to the expression: with acidity, sourly-

## **ácido**

= acid is a compound that contains hydrogen, which will be replaced, partially or totally, with a metal to form a salt. Acids usually pungent flavor, are generally corrosive and they turn red litmus blue ( dye plant ). There are two main kinds of acids: inorganic acids or minerals derived from mineral sources and organic acids that contain carbon and are derived all living or natural-sources

## **ácido acetilsalicílico**

ACETYLSALICYLIC acid or ASPIRIN: derived salicilado ( 41 salicylic acid; and is used in medicine, for their properties, antipyretic, anti-inflammatory, analgesic and anticoagulant.

## **ácido adenílico**

adenylic acid - refers to alfosfato of adenosine, cyclic nucleotide formed from ATP (adenosine tri-phosphate)-

## **ácido ascórbico**

Ascorbic acid = is the name given to the vitamin C or antiscorbutic.

## **ácido bórico**

BORIC acid: it is a white crystalline substance slightly soluble in cold water ( 1.95 g in 100 g of water at 0 ° C ) and very soluble in boiling water ( 27.5 g 100 ° c ) This acid is extracted from certain volcanic origin natural waters, but also manufactured treating borax with sulfuric acid or hydrochloric acid. Boric acid is a mild antiseptic frequently incorporated into talcum powders. Used as a flux in soldering or Tan, the hardening of steel surfaces and glassware and locería industries.

## **ácido clorhídrico**

**HYDROCHLORIC acid:** we can say that hydrochloric acid is also known with the name of " Acid muriatic ". This acid is made with salt current ( 41 sodium chloride; treated with sulfuric acid and dissolving the gas ( 41 hydrogen chloride; in water. It is a colorless liquid in its pure and beige, State of pajoso color in its commercial version. In both forms he emits vapours toxic and penetrating. This acid is widely used in chemical industries for cleaning and burnishing metal surfaces, production of hydrochloric gas, tanned skins and try to oils and fats.

### **ácido desoxirribonucleico**

**DEOXYRIBONUCLEIC acid:** Abbreviation: DNA or DNA. Molecule extremely complex and high molecular weight which is the essential constituent of chromosomes. The DNA molecule consists of two chains threaded in double helix, taking each string of a twisted ladder shape that each column is represented by a nucleotide.

### **ácido graso**

**FATTY acid:** it is a molecule consisting of a long hydrocarbon chain with a terminal acid function, of which there are several varieties in the human body, which are the constituents of fats and lipid molecules. Some fatty acids are not synthesized by the body and must be supplied by the food; they are called essential.

### **ácido hialurónico**

**hyaluronic acid** = it's a molecule glucídica acid with a high molecular weight, constituent fundamental of connective tissue which ensures the impermeability to foreign substances.

### **ácido láctico**

= lactic acid is a substance that is produced by fermentation of the sugar of milk or lactose by bacteria. There are four types of lactic acid with the same chemical formula; one of them is the whey.

### **ácido ribonucleico**

**ribonucleic acid** = its abbreviation: RNA or RNA. It is a complex molecule and high molecular weight made up of a large number of nucleotides present in the nucleus and the cytoplasm of the cell and has a key role in the transmission of the genetic message, encoding and synthesis of molecules protein specific to the individual and the species.

### **ácido sulfúrico**

= sulfuric acid is obtained from four main sources: pyrite of iron and copper, natural sulphur, sulfur recovered from other industrial gases, gypsum and anhydrite.

### **ácido tánico**

**tannic acid** = it's an astringent substance extracted from the bark of certain trees. The tannic acid or tannin, used primarily in the preparation of Virgin hides that, by this means, are worked in the form of skins.

### **ácido úrico**

**uric acid** = is presented as the end of the physiological degradation of the purine 40 bases; nitrogen compounds entering the Constitution of nucleic acids, ) whose blood, normally close to the 50 mg/l, rate rises in the drop-

### **ácidocetosis**

**acidocetosis** = is presented as a metabolic condition characteristic of diabetic coma, causing, by excessive degradation of fats, an accumulation of ketone bodies coming quickly to acidosis.-

## **ácidos**

It is said of those flavors as verjuice or vinegar -

## **ácidos adenílicos**

acids adenylic-owned alfosfato of adenosine, cyclic nucleotide formed from ATP (adenosine triphosphate) -

## **ácigos**

Azygos-refers to the expression: central beam of the palate-veil muscles

## **ácrono**

achrone-refers to the expression: that which has no duration or that lasts for an instant only-

## **áctor**

actor - referred to in alabuelo of Patroclus, who reigned in Aulis and was stripped of his spear per shift, who accompanied Aeneas -

## **ácula**

It refers to the umbeliferous plant, with white flowers, dried fruit and erect stem-

## **áculas**

Belonging to the umbeliferous plant, with white flowers, dried fruit and erect stem.

## **ágono**

Agon, which lacks of / has no / no = angles.

## **ágreða**

The expression :Province of Soria, Community of Castile and León, Spain-

## **águila**

Eagle-refers to a constellation located in the cosmic areaEquatorial-

## **águila áquita**

Eagle Aquita-this is a constellation located in the cosmic areaEquatorial-

## **águila calva**

Bald Eagle - refers alave accipitrida, which can live 20 to 30 years, being a majestic flying -

## **águila caudal**

Eagle tail - referred to in alaguila which has a square tail, is tawny in color and reaches larger than the common -

## **águila leontocéfala**

leontocephalic eagle refers to the expression : to be fantastic with an eagle's body and a lion's head.

## **águila o áquita**

Eagle or Aquita-it is a constellation located in the equatorial cosmic zone

## **águila-áquita**

Eagle - Aquita-this is a constellation located in the cosmic areaEquatorial-

## **águilas**

Eagles-belonging to the " diurnal bird of prey, with peak right at the base and curved at the tip, rounded tail "-

## **águilas culebreras**

Eagles culebreras-pertenecientes " diurnal bird of prey, large head, Ashy brown back and white lower with chestnut spots "-

## **álcalis**

alkali-belonging to the soluble base that neutralizes acid and turns blue litmus red.

## **álgidos**

relating or pertaining climax or critical almomento of a process-

## **ámbares**

. belonging to the fossil of coasts of the Baltic, amarilla-quebradiza - resin-aromatic - volatile

## **ápodos**

Apodosse is of a / / unasuborden of Teleost fish such as the anguila.// lack of feet.

## **áquila**

Aquila-constellation located in the equatorial cosmic zone

## **áquila águila**

Aquila Eagle-it is a constellation located in the equatorial cosmic zone-

## **áquila o águila**

Aquila or Eagle-refers to a constellation located in the cosmic areaEquatorial-

## **áquila-águila**

Aquila - Eagle-refers to a constellation located in the equatorial cosmic zone-

## **árbol de la vida**

tree of life-refers to the expression : symbol linked to the naturalistic conception of the Mesopotamian religion, in such a way that trees and plants were considered sacred-

## **árticos**

relating or belonging North alpolo

**áspero aspérulo**

rough asperulus- it is said of a type of vegetable indument that is not soft to the touch, with irregularities-

**áspero escabroso**

rough rough- it is said of a type of vegetable indument that has rigid hairs, forming a rough surface-

**áspero estrigoso**

rough strigous- it is said of a type of vegetable indument covered with rigid and sharp hairs.

**áspero o aspérulo**

rough or asperic- it is said of a type of vegetable indument that is not soft to the touch, with irregularities-

**áspero o escabroso**

rough or rugged- it is said of a type of vegetable indument that has rigid hairs, forming a rough surface-

**áspero o estrigoso**

rough or strigous - it is said of a type of vegetable indument covered with rigid and sharp hairs-

**áspero,aspérulo**

rough , asperic - it is said of a type of vegetable clothing that is not soft to the touch, with irregularities-

**áspero,escabroso**

Rough, rugged- is said to be a type of plant clothing that has stiff hairs, forming a rough surface.

**áspero,estrigoso**

Rough, Strigose- A type of vegetable clothing covered with stiff and stinging hairs.

**áspero-**

rough - it is said of a type of vegetable clothing that is not soft to the touch, with irregularities

**áspero-aspérulo**

Rough-asperulous- is said of a type of vegetal clothing that is not soft to the touch, with irregularities.

**áspero-escabroso**

Rough-rugged - is said to be a type of plant clothing that has stiff hairs, forming a rough surface.

**áspero-estrigoso**

Rough-strigosus- is said to be a type of vegetable clothing covered with stiff and stinging hairs.

**ásperos**

rough-belonging to a type of vegetable clothing that is not soft to the touch, with irregularities-

**ásperos - escabrosos**

rough - rugged - belonging to a type of vegetable clothing that is not soft to the touch, with irregularities-

**ásperos aspérulos**

Rough Asperulus- belonging to a type of vegetal clothing covered with short and fine hairs of dense shape giving a velvety appearance.

**ásperos estrigosos**

rough strigos- belonging to a type of vegetable clothing covered with stiff and stinging hairs-

**ásperos o aspérulos**

Rough or Asperulus- belonging to a type of vegetal clothing covered with short and fine hairs of a dense shape giving a velvety appearance-

**ásperos o escabrosos**

rough or rugged - belonging to a type of vegetable clothing that is not soft to the touch, with irregularities

**ásperos o estrigosos**

Rough or Stiff - belonging to a type of vegetable clothing covered with stiff and stinging hairs.

**ásperos,aspérulos**

rough, asperulous- belonging to a type of vegetal clothing covered with short and fine hairs of dense shape giving a velvety appearance-

**ásperos,escabrosos**

rough, rugged - belonging to a type of vegetable clothing that is not soft to the touch, with irregularities -

**ásperos,estrigosos**

rough, strigose- belonging to a type of vegetable clothing covered with stiff and stinging hairs-

**ásperos-aspérulos**

Rough-asperulous- belonging to a type of vegetal clothing covered with short and fine hairs of dense shape giving a velvety appearance.

**ásperos-escabrosos**

rough-rugged- belonging to a type of vegetal clothing that is not soft to the touch, with irregularities-

**ásperos-estrigosos**

Rough-strigose- belonging to a type of vegetable clothing covered with stiff and stinging hairs-

## **áticos**

relating or pertaining alaticismo

## **átomo**

Atom - refers to the expression: the atom is made up by: 1 ) a central core, which concentrates almost all of their mass, electrical charge with positive - 41-2; a cloud of electrons which spin to her around with a negative electric charge -

## **átomos**

((atoms belonging to the expression: atoms are formed by: 1) a central core, which concentrates almost all of their mass, electrical charge with positive - 2) a cloud of electrons swirling to her around with a negative electric charge -

## **átono**

skin, which lacks of / has no / no = stressed accent.

## **áulicos**

relating or pertaining alpalacio or the Court. -

## **ávoras**

belonging to a variety or species Americana-tropical depalmera - of its fruit butter corozo - Gets

## **ázoe**

azoe-name that was given to nitrogen in ancient times

## **baal**

one of the names given to the Supreme God by the Phoenicians-

## **baalbek**

Baalbek-referred to in alciudad and of the Lebanon, in vicinity of the Letani River Valley, considered a world heritage site -
