

SPANISH DICTIONARY

Verónica Núñez

INTRODUCTION

www.wordmeaning.org is an open and collaborative dictionary project that, apart from being able to consult meanings of words, also offers its users the possibility of including new words or nuancing the meaning of existing words in it. As is understandable, this project would be impossible to carry out without the esteemed collaboration of the people who follow us around the world. This e-Book, therefore, was born with the intention of paying a small tribute to all our collaborators.

Verónica Núñez has contributed to the dictionary with 3 meanings that we have approved and collected in this small book. We hope that the reader is very valuable and if you find it useful or want to be part of the project, do not hesitate to visit our website, we will be delighted to receive you.

Working Group

www.wordmeaning.org

autoconstruccion cerebral

Multisensory brain autoconstruccion. Be specific by the inherent neurobiological capacity, to modify the biophysical, biochemical and metabolic conditions in which reception structures of brain systems, they are to interpret and respond more effectively to the temporo-spatial demands of the messages that are received. Modifications are produced from waking up the next night sleep and do not stop during, which documented the continuity of life. Brain self-construction is vital to that circumstantial multi-sensory content of information the present imposed the dynamics of the past, allowing the individual projection towards a likely future.

biopsicologia

study of structures neurobiological underpinning the organic architecture of behaviors and attitudes as functions.

psi

emerging brain function of unit persona. integrated memories evocations, memories or imaginings, product never causes.
