

SPANISH DICTIONARY

José Luis Sánchez Abela

INTRODUCTION

www.wordmeaning.org is an open and collaborative dictionary project that, apart from being able to consult meanings of words, also offers its users the possibility of including new words or nuancing the meaning of existing words in it. As is understandable, this project would be impossible to carry out without the esteemed collaboration of the people who follow us around the world. This e-Book, therefore, was born with the intention of paying a small tribute to all our collaborators.

José Luis Sánchez Abela has contributed to the dictionary with 3 meanings that we have approved and collected in this small book. We hope that the reader is very valuable and if you find it useful or want to be part of the project, do not hesitate to visit our website, we will be delighted to receive you.

Working Group

www.wordmeaning.org

epámetro

Synonymous with Parometro, specifying that the figure, moved to meters, used is determined by the EPA or survey of active population.

kilopar¿metro

kilopar metro is incorrectly written and it should be written as "Kiloparómetro" being its meaning:?
Kiloparometro, unit of measure containing thousand times a parometro. A parometro is the average measurement a stationary unit, i.e. 1.70 meters.

parometro

parometro is incorrectly written, and should be written as "Parometro" as meaning:
Distance in meters of a standing determined by the average height of a person in a given country. Differentiates two types: vertical Parometro, to construct hypothetical columns where each stopped Spanish measures 1.70 meters and parometro horizontal, to construct rows, by measuring the distance between shoulders average of 0.90 m. The parometro allows us to display a vector image of the unemployment problem. Thus the parometro projects us the image of a row of unemployed playing shoulder to shoulder that small distance between Lisbon and Moscow, which offers more wisdom than the number of 5.444.600 unemployed in Spain that offers us EPA's June 2. 015tambien thinking vertically, gives us the vision of a column that reached 40 Seattle; in the Pacific of USA) to the North and from there to Moscow polo, or a column of unemployed who arrived from Madrid to Beijing.
